

REMARKS

This divisional application has been filed for the examination of the apparatus claims which were canceled from the parent application following a restriction requirement.

In addition, a new abstract has been added, the title has been changed to reflect the claimed subject matter, the specification has been amended to add a reference to the parent application and to use proper subject matter headings, and Figure 2 has been amended as was done in the parent application to label the axes of the graph.

Respectfully submitted,

Ira J. Schultz
